PERSONAL STATEMENT

Data Science undergraduate with hands-on experience in Python, SQL, and machine learning, and a growing specialization in Generative AI, including RAG pipelines, QLoRA fine-tuning, and LangChain-based applications. Skilled in building data pipelines, analytics workflows, and NLP solutions, with 12 professional certifications across AWS, Anthropic, Hugging Face, Fortinet, and IBM. Seeking a Data Science, Machine Learning, or AI Engineering internship to apply analytical and technical skills to real-world problems.

TECHNICAL SKILLS

- **Programming:** Python, SQL, Java, C++, C#, R
- **Data Analytics:** Excel (Pivot Tables, Financial Modelling), Power BI, Tableau, Data Visualization
- **AI & Machine Learning:** Machine Learning, Deep Learning, NLP, Generative AI, QLoRA, RAG, LangChain, Vector Databases, Model Context Protocol
- **Cloud & Tools:** AWS, Git, Jupyter, VS Code

PROJECTS

Financial Statement Intelligence Assistant | Python, QLoRA, RAG, Gemma [Ongoing]

- Fine-tuning a Gemma language model using QLoRA and a retrieval-augmented generation (RAG) pipeline to ground responses in financial documents.
- Aims to improve automated understanding and contextual analysis of financial statements.

Automatic Chord Classification | Python, Deep Learning, Audio Signal Processing [Ongoing]

- Developing a deep learning model to classify musical chords from raw audio signals using audio signal processing techniques.
- Supports automated music transcription and audio analysis use cases.

Social Media Artificial Engagement Detector | Python, Machine Learning [Ongoing]

- Building a machine learning model to detect artificial engagement patterns and bot-driven activity on social media platforms.
- Aims to improve content authenticity and trust on social platforms.

Crypto Price Prediction | Python, Yahoo Finance API

- Built a financial data pipeline integrating the Yahoo Finance API for live and historical market data.
- Applied time-series modelling to forecast cryptocurrency price movements and surface short-term market trends.

Knowledge Graph Generator | Python, LangChain, OpenAI, PyVis

- Extracted entity relationships from unstructured text using LangChain and OpenAI language models.
- Rendered results as interactive PyVis network visualisations to support stakeholder and relationship mapping.

EDUCATION

Sri Lanka Institute of Technology (SLIT)

2023 – Present

Bachelor of Science (Honours) in Data Science

- Modules: Python, Java, C++, C#, SQL, OOP, Web Development, Databases

Maliyadeva College

2022

CERTIFICATIONS

Cloud & AI

- AWS Artificial Intelligence Practitioner — Amazon Web Services, 2026
- Fundamentals of Machine Learning and Artificial Intelligence — Amazon Web Services, Apr 2026
- AWS Cloud Quest: Generative AI Practitioner — Amazon Web Services, Apr 2026
- AWS Knowledge: Cloud Essentials — Amazon Web Services, Mar 2025

Generative AI Development

- Introduction to Model Context Protocol — Anthropic, Apr 2026
- Model Context Protocol: Advanced Topics — Anthropic, Apr 2026
- A Smol Course Unit 1: Supervised Finetuning — Hugging Face, Apr 2026
- LangChain & Vector Databases in Production — ActiveLoop, 2026

Cybersecurity

- Fortinet Certified Associate Cybersecurity — Fortinet, Mar 2025 – Mar 2027
- Fortinet FortiGate 7.4 Operator — Fortinet, Mar 2025
- Cybersecurity Fundamentals — IBM, Mar 2025
- IBM Z Day 2025 SE – Security — IBM, Apr 2025
- IBM Z Day 2025 SE – AI & Data — IBM, Apr 2025
